

GC_DZTEXT - Text Incremental Copy

1043 GstarCAD Malaysia April 5, 2017 [Express Tools](#) 0 4364

This command can accomplish kinds of incremental methods for text.

Menu: Express>Text Tool>Text Incremental Copy

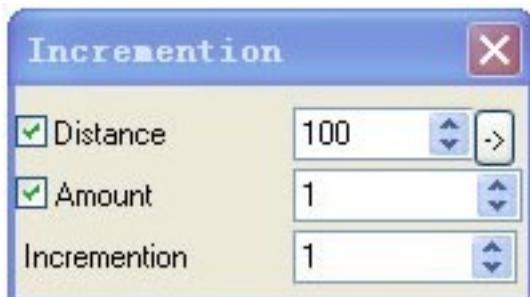

Command Entry: GC_dztext

The incrementation dialog box is displayed:

Distance : Specify incremental Distance, you can input value directly or single click the button on the right to specify by the crosshair.

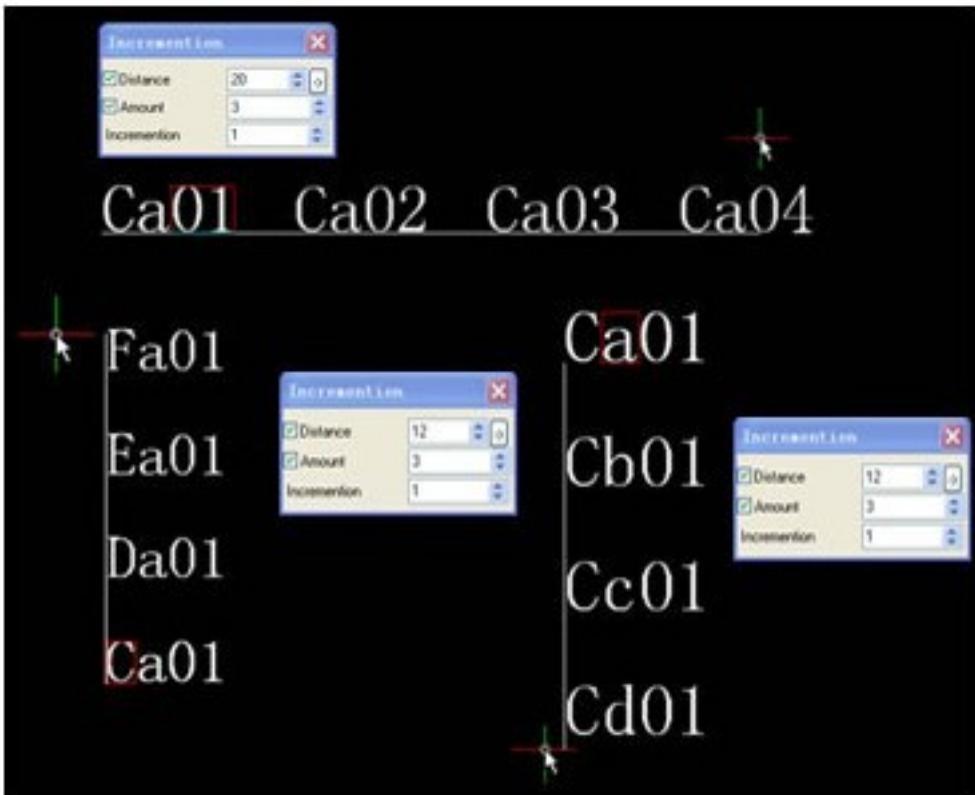

Amount : If do not specify Amount, the system will calculate the amount according to the initial points of the crosshair.

Incrementation : Specify the incrementation.

Select Incremental Object : If there are mixed letter cases and numbers in the text, user can specify different incremental objects.

1. Open Text Incremental Copy;
2. Select the incremental objects;
3. Set incremental methods, the completed incrementation effect is displayed.

Free Incremental : It is used when the Incremental Copy location is relatively free, for example: number of spare parts in the assembly drawing.

1. Open Text Incremental Copy;
2. Do not select Distance or Amount, please set incrementation as you need;
3. Select the text;
4. Specify incremental text location as below:

Distance only : It is used if the distance of incremental text is fixed, for example: number column in the form.

1. Open Text Incremental Copy;
2. Select Distance and do not select Amount, please specify Incrementation and Distance as you need. You can input value directly or single click the button on the right to specify by the crosshair;
3. Select the text;
4. Specify incremental distance and direction. The system will automatically calculate the amount according to the initial points of the crosshair as below:

The diagram illustrates the 'Incrementation' dialog box and its effect on a table. The dialog box has three checkboxes: 'Distance' (checked), 'Amount' (unchecked), and 'Increment' (checked). The 'Distance' field is set to 7, and the 'Increment' field is set to 1. A large blue arrow points from the original table on the left to the modified table on the right.

NO.	Name
41	Rolling bearing
40	Roller
39	Low gear
38	bearing cap
37	gaskets
36	Felt circle
NO.	Name

Original Table:

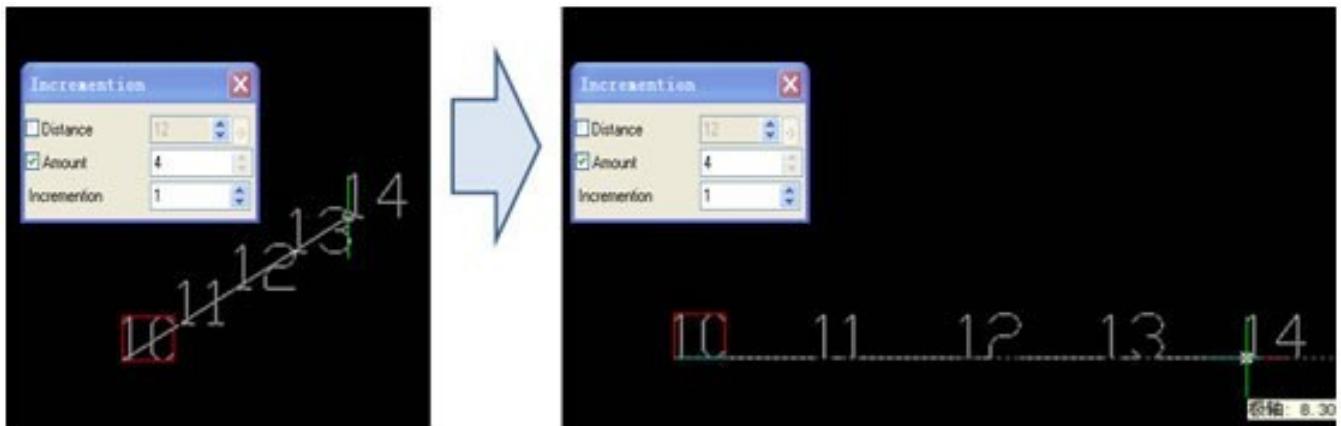

NO.	Name
41	Rolling bearing
40	Roller
39	Low gear
38	bearing cap
37	gaskets
36	Felt circle
NO.	Name

Modified Table:

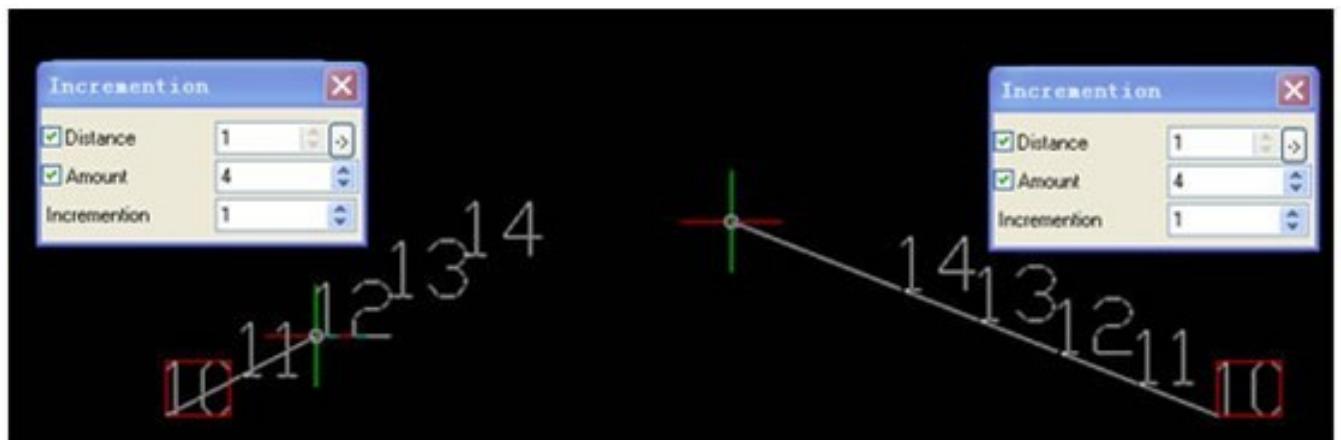

NO.	Name
41	Rolling bearing
40	Roller
39	Low gear
38	bearing cap
37	gaskets
36	Felt circle
NO.	Name

Amount only : It is used when you know the incremental amount and do not know the incremental distance.

1. Open Text Incremental Copy;
2. Select Amount and don't select Distance, please specify the Incrementation and Amount as you need;
3. Select the text;
4. Specify the incremental distance and direction. The system will place the incremental text between initial points of the crosshair as below:

Distance and Amount : You can fix the Amout and Distance first, and use the crosshair to specify the incremental direction.
