Offline Upgrade in other server

If you would like to upgrade GstarCAD 2020 to another server that is not the same as the one you installed the old version,

first, you need to return the authorization of GstarCAD old version from the GstarCAD License Manager server which can access from the **start** button ¬ **All programs** - **GstarCAD Network License Manager**.

After the authorization of GstarCAD old version **returned**, contact your distributor and provide the License key and the upgrade version, after you get the reply
