ANNOALLVISIBLE system variable

Function Description:

The **ANNOALLVISIBLE** system variable is used to hide or display annotative objects that do not support current annotation scales.

The **ANNOALLVISBLE** system variable settings are saved separately for model and each layouts.

Type : Integer
Saved in : Drawing
Initial value : 1
Range : 0,1

System Variable Value:

0 : only display annotative objects that support current annotation scales
1 : display all annotative objects

Note : when the **ANNOALLVISIBLE** system variable has set to be 1, it only display one scale expression, even if the annotation objects support multiple scales
