

BEDIT command

1997 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 1414

The **BEDIT** command is used to open the Block Editor.

Command Access:

Ribbon : Home > Block > Block Editor

Menu : Tools > Block Editor

Command : BEDIT

Shortcut : Select a block and right-click; click the "Block Editor" option

Function Description:

In the "Edit Block Definition" dialog box, users could edit existing block definition or create new block definition, and then press ENTER to open the Block Editor. If the **BLOCKEDITLOCK** system variable is set to 1, the block editor could not be opened.

The block editor is a separate tool that used to create and modify block definition for current drawing and add dynamic action to blocks.
