

LIGHTLIST command

2199 GstarCAD MY /KW August 17, 2021 [CAD Commands](#) 0 956

The **LIGHTLIST** command is used to turn on or turn off the "Lights in Model" palette.

Command Access:

Menu : View > Render > Light> Light List

Command : LIGHTLIST

Function Description:

The "Lights in Model" palette is used to list all lights in model. Select one or more lights and Right-click, the shortcut menu displays. Users could delete or change properties of selected light.
