

## QRCODE command

2305 GstarCAD MY /KW August 20, 2021 [CAD Commands](#) 0 1160

The **QRCODE** command is used to provide easy access to information through a mobile device like smartphone or table

**Command Access :**

**Command Entry :** QRCODE

**Menu :** Home>Block>QR Code

A QR code (quick response code) is a type of bar code that is used to provide easy access to information through a mobile device like smartphone or tablet. Comparing with barcode, QR Code can storage more information and is widely applied in many fields, for example; product anti-fake, advertising push, web links, data download, commodity transaction, Positioning/navigation, electronic documents, business card exchange, etc. Take advantage of QR Code to make text and block attributes from your drawing scannable using any mobile phone or tablet with a camera. All you need is one of many available QR code reader applications for your device.
