

QUIT command

2310 GstarCAD MY /KW August 20, 2021 [CAD Commands](#) 0 992

The **QUIT** command is used to exit programs.

Command Access:

Menu : File > Quit

Command : QUIT

Function Description:

If there is no modification in drawing since last saving, users could exit by QUIT command. If users have made some modifications, it will prompt to save them or give up before exiting by QUIT command.

If there is no modification in Read-only file, users could exit by QUIT command. If users have made some modifications, it will prompt to save them by SAVEAS command or give up before exiting by QUIT command.
