

SAVE command

2337 GstarCAD MY /KW April 11, 2022 [CAD Commands](#) 0 1430

The **SAVE** command is used to save a drawing with current name or a new name.

Command Access:

Menu : Application menu > Save

Menu : File> Save

Command : SAVE

Shortcut : CTRL+S

Function Description:

Users could save current drawing by clicking "Save" button in "Save drawing as" dialog box or entering a new File name to save a copy of it. If the drawing is read-only, users could use the SAVEAS command to save it with another name.

Note: the SAVE command has the same function of the QSAVE command. The SAVE option in the FILE menu or standard toolbar or "Quick Access" toolbars are all the QSAVE command.
