

Network Licenses Borrow and Return (2020 - 2022)

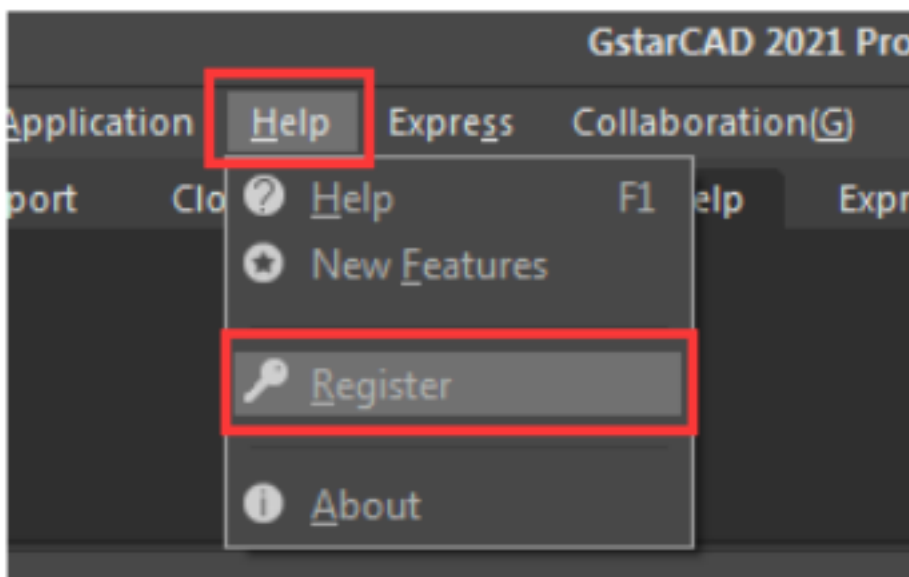

2607 GstarCAD Malaysia September 30, 2019 [Activate / Deactivate](#) 0 3851

GstarCAD provides the function that you can borrow and return licenses from the server at the user client. In some special cases, you need to transfer one or more nodes to an individual computer.

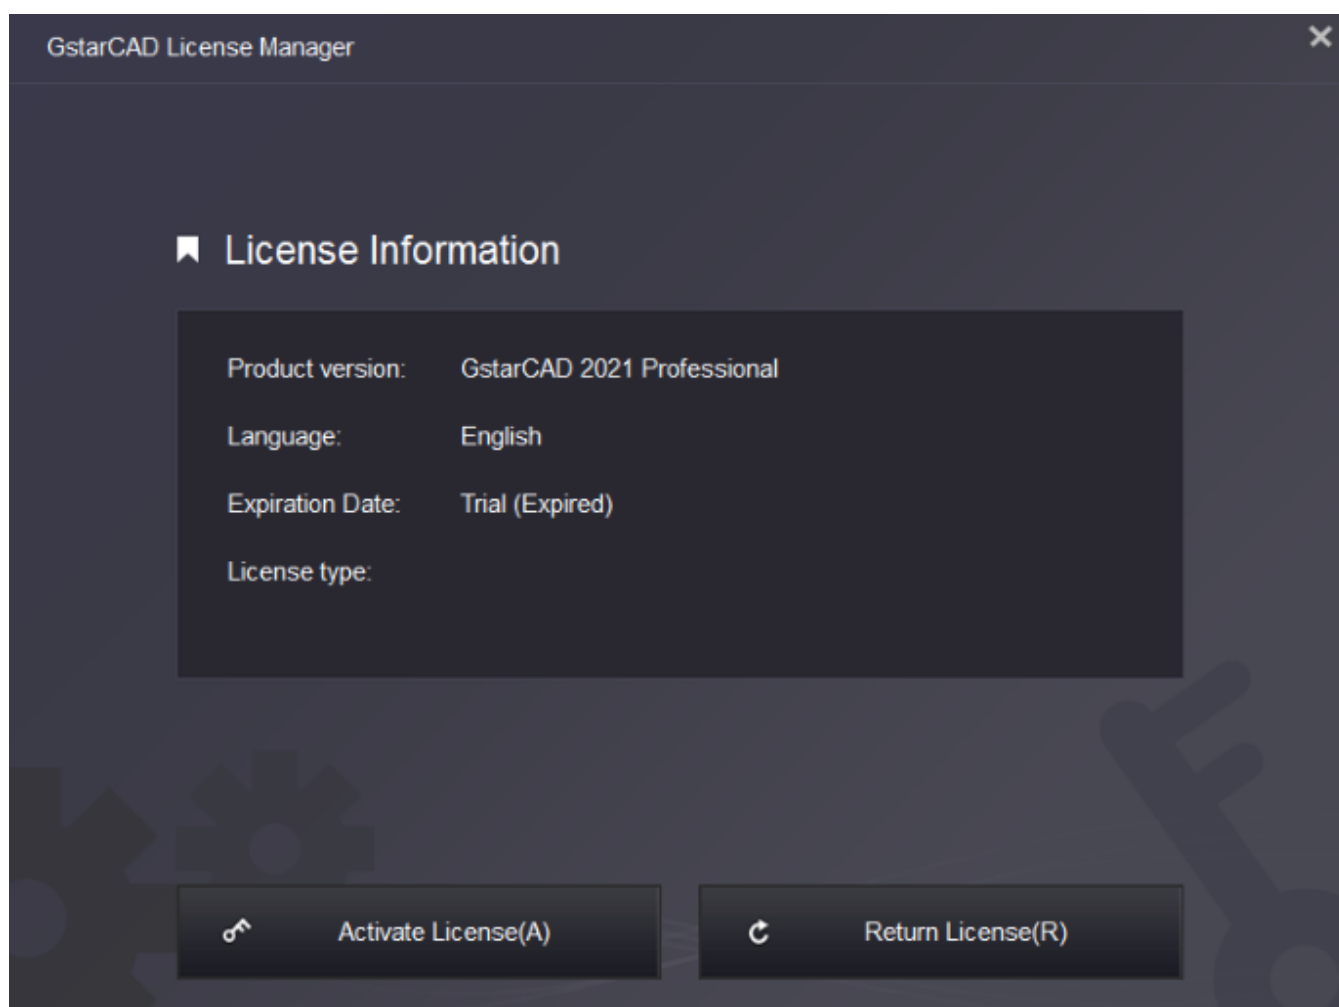

For example, you need to activate GstarCAD on a laptop for a certain time. It is great flexible to use this function. There are 2 steps to use it: **Borrow License** and **Borrowed Return**.

Requirement conditions?

1. GstarCAD has to be installed on the machine or computer.
2. It has to be in the same local area network and connect to the server. Click **Help** → **Register** to open GstarCAD License Manager in GstarCAD.

Then the following window opens:

Borrow License from Server

Please follow the steps below to borrow the licensee from the server at the client.

Click **Activate** → **Borrow License (B)** and select a version of GstarCAD (Professional, Standard, and Education).

GstarCAD License Manager

License Key (L)

Online Activation(O)

Manual Activation(M)

90 days

180 days

Borrow

Exit(E)

- **Server Name or IP:** Input the server IP address (e.g. 192.168.0.66 is server local IP address).
- **Expiration Date:** Date to borrow and return, you just only need to fill in the date you return because it is counted from the date when you Borrow click, or you can choose or set the duration.

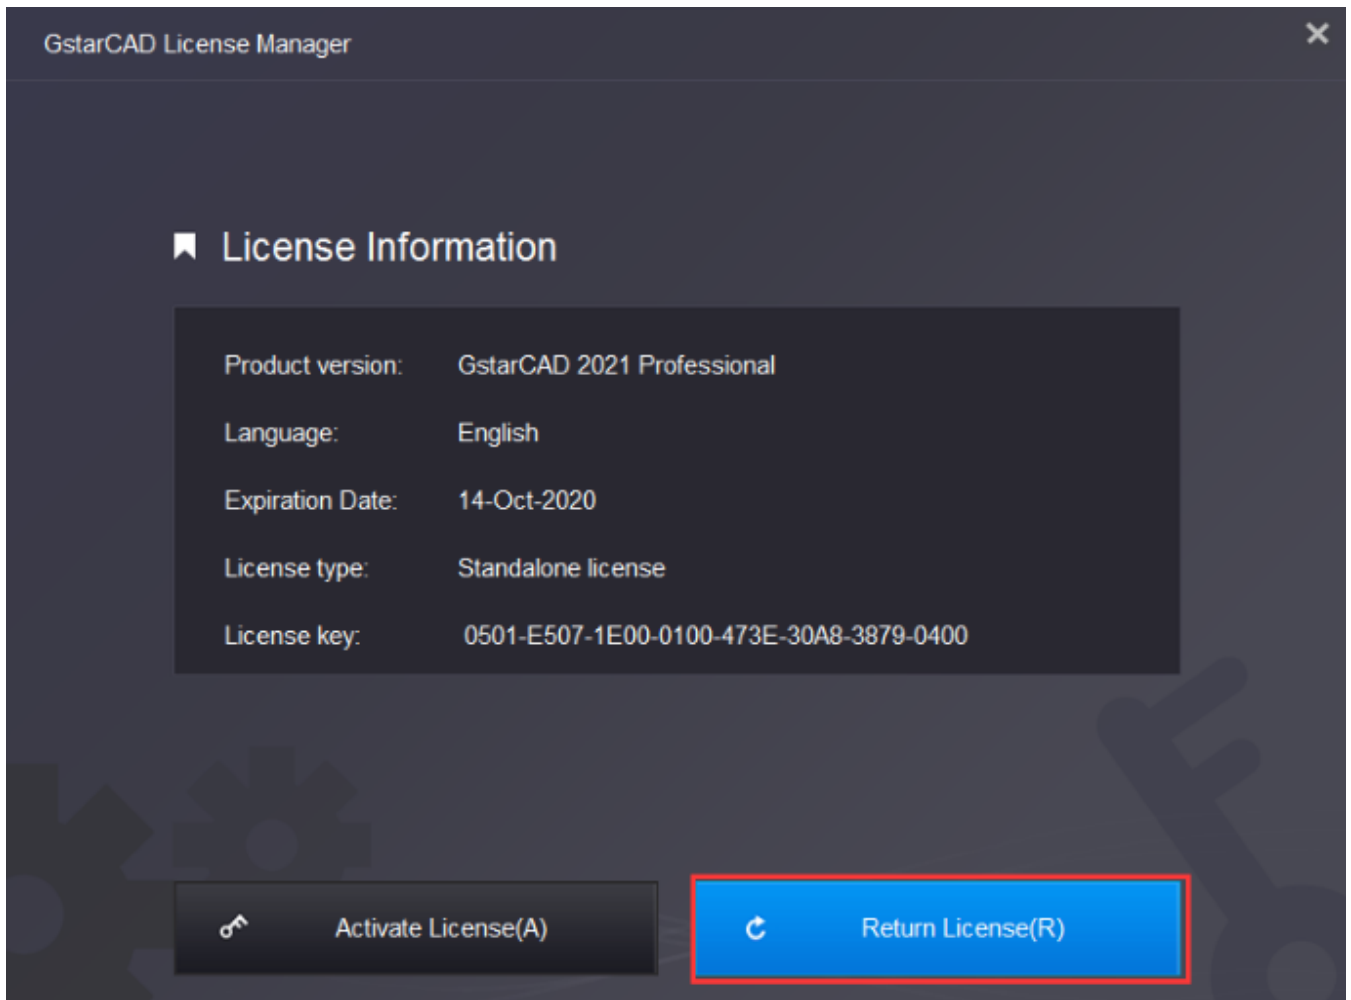

And then you can see the following message that means you successfully borrow the license. Click the **OK** button and restart your software to finish the process.

Borrowed Return

it is better to return the borrowed node to the server if you do not need it.

Open GstarCAD License Manager which you can access from the **Help** menu-**Register** and click **Return License (R)** button

Click **Borrowed Return (B)** and select the license you want to return. Then Click the **Return** button.

Click the **OK** button to finish the license returning and you can see the license you returned disappears.
